

QuickFix™ Low Voltage Controller

202-210

Description

QuickFix™ Low Voltage Controller Pre-Programmed

The Pre-programmed QuickFix™ Low Voltage Controller offers a wide variety of pre-programmed effects that can be modified. The effects can be customized with the help of an NFC-enabled smartphone. All effects can also be triggered by a date- or time-related event.

The real-time clock (RTC) is stored environmentally friendly without battery, the currentless buffering is sufficient for 21 days.

The QuickFix™ Low Voltage Controller is compatible with the following power supplies: 35W, 70W, 90W, 120W oder 200W
